¹ The row's [MED] in combination with the [MED] found in this column is considered a valid dual maintenance medication combination.

³ Any combination of [MED]s with a YES in this column is considered a valid conditioning medication. Conditioning medications are medications a patient receives prior to an HSCT.

Those flagged with 'yes' as used for other cancers were mainly used off-label in the early days
3-5yr OS pre 2014 so patients (and Tx) may be less relevant for current needs
Start the observation window for NDMMM from Jan 2016

Other MM drugs to include:
talquetamab, elranatamab, linvoseltamab
What about:
Pamidronate (Aredia) - Don't include (supportive care)
Zoledronic Acid (Zometa) - Don't include (supportive care)
Carmustine (BiCNU) - No label (could be used as conditioning) - Don't include
Plerixafor (Mozobil) - Don't include - stem-cell mobilizer used in transplant settings

Category	Drugs
Bispecific antibodies (newer)	Elranatamab, Talquetamab, Linvoseltamab
Bone-modifying agents	Zoledronic acid, Pamidronate
Chemotherapy/Other	Carmustine, Plerixafor
