Definition of a maintenance period: The LOT's initial regimen transitions into a maintenance regimen, such that non-maintenance medications present during the initial regimen are discontinued leaving only maintenance medications for x days.

1. Maintenance-approved medication list:

- a. Lenalidomide
- b. Bortezomib
- c. Daratumumab
- d. Ixazomib
- e. Thalidomide
- f. Bortezomib/lenalidomide
- g. Carfilzomib/lenalidomide
- h. Daratumumab/lenalidomide

Pull patients whose LOT1 induction regimen is a combination regimen that contain either a valid monotherapy mtz agent, or a valid dualtherapy mtz combination.
The following patient examples are what we are looking to understand.

LOT1 Maintenance Examples

Patient #1: is combination regimen that contains a mtz-approved monotherapy agent.
The mtz period starts with CYCL drops off and BORT is left alone.
