

Time Period	Variable	Label	Values	Definition	Code Lists Group	Additional Notes	Date Modified (Initials + Date)	QC Reviewed (Initials + Date)
FU_PD	CODE	The code used to identify the [MED]	character	The code source	Tab 40, 41			OK24FEB2025
FU_PD	CODE_TYPE	The type of code used to identify the [MED]	NDC HCPCS	The code type source	Tab 40, 41			OK24FEB2025
FU_PD	CLAIM_TYPE	Claim type	Medical Pharmacy	The code type source	Tab 40, 41	DAY_SUPPLY_SOURCE reflects the supply (fill) of medication received from an RX claim (i.e., the number of pills received). It can take on any continuous number 1 + but often equals 14, 28, 30, 60, 90 etc. Remove pharmacy claims (CLAIM_TYPE_SOURCE = pharmacy) with a days supply < 1. All medical claims (CLAIM_TYPE_SOURCE = medical) will		OK24FEB2025
FU_PD	DAY_SUPPLY	Days supply found on pharmacy claims	numeric	= DAY_SUPPLY_SOURCE if CLAIM_TYPE_SOURCE=pharmacy else 28 If CLAIM_TYPE_SOURCE=pharmacy and (DAY_SUPPLY_SOURCE < 1 or DAY_SUPPLY_SOURCE is missing) then delete	Tab 40, 41	If a patient has multiple claims for CLAIM_TYPE = pharmacy on the same DATE_SERVICE, keep the claim with the max DAY_SUPPLY value.		OK24FEB2025

Section A: Defining Analytic Variables

Note to Programmer: Use the naming convention 'TimePeriod_Variable'

Time Period	Variable	Label	Values	Definition	Code Lists Group	Additional Notes	Date Modified (Initials + Date)	QC Reviewed (Initials + Date)
	FU_PD	DATE_SERVICE	Claim/claim-line date of service	=DATE_SERVICE_SOURCE Keep only those claims in MMA_[MED] where DATE_SERVICE >= INDEX_DATE	Tab 40, 41	If a patient has multiple claims for CLAIM_TYPE = pharmacy on the same DATE_SERVICE, keep the claim with the max DAY_SUPPLY value. If a patient has multiple claim-lines for CLAIM_TYPE = medical on the same DATE_SERVICE, keep only one The DATE_SERVICE_SOURCE of the claim/claim-line for a given patient must occur between the patient's index date and the patient's ENDDATE (inclusive).		OK24FEB2025
						Create patient-level MMA_[MED] datasets containing <u>only</u> the processed claims having each specific [MED] MMA medication code (among the patients from the ELIG_COH). For example, MMA_BORT would only contain those processed claims with an NDC or HCPCS code for BORT.		
	FU_PD	MED_ABBR	The medications abbreviation	E.g., BORT, LENA, etc. = CL_MED_ABBR in CODELIST where CODE = CL_CODE	Tab 40, 41 & 41a, 41b	For dataset MMA_[MED], MED_ABBR will have an identical value for all rows equal to [MED] (e.g., BORT). Patients with biosimilars (e.g., & Daratumumab Hyaluronidase) are categorized as the same medication. A patient is allowed to have duplicate DATE_SERVICE for [MED] if a patient has both a pharmacy and a medical claim or claim-line on the same DATE_SERVICE.		OK24FEB2025
						For dataset MMA_[MED] MFD_CL_ASS For dataset MMA_[MED] MFD_CL_ASS
